Summary

Welcome! I'm Aly, a software developer with a passion for creating intuitive and accessible digital experiences. My journey in software development has allowed me to develop a keen eye for detail and a deep understanding of user-centric design principles. I'm currently completing my training at Microverse, a remote software development program, where I've gained hands-on experience working on a variety of projects.

My strength lies in the ability to thrive in remote work environments, leveraging technology for effective communication and contributing to collaborative projects. I'm proactive about keeping up with the latest industry trends and technologies, ensuring my work is always at the forefront of innovation.

My technical skills span across several areas, but I have a particular interest in front-end development. I'm proficient in languages such as JavaScript, HTML, CSS, and React.js, and I'm always eager to learn more and expand my skill set.

For a closer look at my work, you can visit my GitHub profile: [AlyAtalla.github.io](https://github.com/AlyAtalla). If you're interested in discussing potential opportunities or just want to connect, feel free to reach me at Aliatalla93@gmail.com.

Thank you for taking the time to read my profile. Let's build the future of the web together

Experience

Full-stack Developer

Freelance

Jan 2024 - Present (1 month)
